Farimah Ghezloo

Cellular & Molecular Biologist

PERSONAL DATA

E-mail farimah.ghezloo@gmail.com
Website https://ghezloo-f.github.io
LinkedIn www.linkedin.com/in/farimah-ghezloo-855497392

RESEARCH INTERESTS

Stem Cells and Development | Neuroregeneration | Cell Biology
Tissue Engineering | Molecular Genetics | Biological Sciences

EDUCATION

B.Sc. IN CELLULAR AND MOLECULAR BIOLOGY **2026**
Ale Taha Institute of Higher Education | *Tehran, Iran*
GPA: 16.67 / 20 overall | 17.24 last two years | 19.46 final year

RESEARCH EXPERIENCE

CONTRIBUTING RESEARCHER **2025–2026**
Neural Differentiation of AF-MSCs | *Manuscript in preparation*

- Isolated and expanded human amniotic fluid–derived mesenchymal stem cells (AF-MSCs) and confirmed their identity by flow cytometry (CD105, CD73, CD90, CD45).
- Cultured AF-MSCs on decellularized amniotic membrane scaffolds, induced neural differentiation with retinoic acid (0.01 and 0.1 µM), and assessed scaffold integration by SEM.
- Measured Nestin and GFAP expression by RT-qPCR (primer design, RNA extraction, cDNA synthesis); 3D culture with 0.01 µM retinoic acid significantly enhanced neural markers versus 2D culture.

LABORATORY TRAINEE, MICROBIOLOGY SECTION **2024**
Amin Laboratory | *Karaj, Iran (3-month rotation)*

- Gained hands-on experience in standard microbiological techniques and diagnostic workflows.

PUBLICATIONS

Articles **Ghezloo, F.** et al. "Neural Differentiation of Human Amniotic Fluid-Derived Mesenchymal Stem Cells Cultured on a Decellularized Amniotic Membrane Scaffold". *Manuscript in preparation.*

SKILLS

Molecular	PCR, qPCR, primer design, RNA extraction, cDNA
Cell Culture	Mammalian cell culture, passaging, cryopreservation
Protein	Western Blot, ELISA
Computational	Bioinformatics (introductory), Python (introductory)
Languages	Persian (native), English (proficient)
